SUMMARY

Python developer with experience in AI and data science, working on projects involving machine learning, deep learning, and natural language processing. Familiar with building data analysis pipelines, training ML models, and developing Python-based applications using common libraries and frameworks.

WORK EXPERIENCE

Project Intern — Computer Science & Engineering, IIT BHU (Varanasi) — Online Jan 2025 – Jun 2025
Department of Computer Science & Engineering, Indian Institute of Technology (BHU)

- Worked on a project focused on converting Sign Language into Text using Python-based approaches.
- Designed and implemented data preprocessing and model training pipelines for sign language recognition.
- Applied machine learning and deep learning techniques for gesture classification and text generation.
- Conducted experiments, tested models, and analyzed results as part of a project-based research internship.
- Completed the internship under faculty supervision and submitted the assigned project within the given timeline.

Project Intern — AI-Based Chatbot Development, CSVTU Bhilai — On-Site Aug 2025 – Nov 2025
University Teaching Department, CSVTU Bhilai

- Developed an AI-based chatbot for college-related queries using Python.
- Implemented natural language processing techniques to handle student and academic queries.
- Worked on intent classification, response generation, and basic conversational flows.
- Tested the chatbot with sample academic and administrative queries for practical usability.

PROJECTS

Virtual Mouse Hand Gesture

- Bhilai, Sept-2024
- Developed a virtual mouse system using hand gesture recognition.
 - Used computer vision techniques to detect and track hand movements.
 - Enabled basic mouse operations such as cursor movement and click actions using gestures.

Sign Language to Text Conversion System

- IIT BHU (Project Internship), Feb-2025
- Developed a sign language recognition system to convert hand gestures into text.
 - Worked on data preprocessing, model training, and gesture classification using Python.
 - Applied machine learning and deep learning techniques to recognize sign language gestures.

AI Chatbot for College Information and Student Support

- CSVTU Bhilai, Aug-2025
- Developed an AI-based chatbot to handle college-related and student support queries.
 - Implemented natural language processing techniques for intent recognition and response generation.
 - Designed the chatbot to answer common academic and administrative questions.

EDUCATION

2022 - 2026	B.Tech(Hons) CSE(Data Science), UTD-CSVTU, Bhilai	(CGPA: 7.0/10)
2021	Class 12th CBSE Board	70.0%
2019	Class 10th CGBSE Board	71.6%

Technical Skills

- **Programming Languages:** Python
- **AI / Machine Learning:** Machine learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), LLM Integration
- **Frameworks/Libraries:** NumPy, Pandas, TensorFlow, PyTorch, OpenCV, Scikit-Learn, Transformers
- **Backend Development:** FastAPI, REST API Development
- **Frontend Technologies:** HTML, CSS, JavaScript, React.js, Next.js
- **Developer Tools:** Git, GitHub, VS Code

RELEVANT COURSES

- **Core Computer Science:** Object Oriented Programming, Database Management Systems, Computer Architecture organization, Computer Network, Operating System, Data Structures and Algorithms.
- **AI and Data Science:** Artificial Intelligence, Data Visualization, Pattern Recognition and Machine Learning, Natural Language Processing.
- **Mathematics and Theoretical Foundations:** Theory of Computation, Cryptography and Network Security.

ACHIEVEMENTS & CERTIFICATIONS

- 2025 Successfully completed a 6-month Project Internship at the Department of Computer Science & Engineering, Indian Institute of Technology (BHU), Varanasi, working on a Sign Language to Text conversion project.
- 2025 Received a Letter of Recommendation from the supervising faculty at IIT (BHU), Varanasi, for successful completion of the project internship.
- 2024 Completed an 8-week online training in Data Science from Internshala, covering data analysis, data visualization, machine learning, and AI fundamentals.
- 2024 Completed an 8-week online training in Data Structures and Algorithms from Internshala, including arrays, linked lists, stacks, queues, trees, and graphs.
